

Inflite The Jet Centre

Job Title: B1 Licenced Engineer Nights

Department: Engineering

Shift Pattern: 5, 5, 4, 5, 5, 4

Reports To: Head of Maintenance

Location: Stansted

Job Purpose:

As a B1 licensed engineer, your primary responsibility is to oversee scheduled and non-scheduled maintenance for aircraft under our Part-145 maintenance control. Upholding regulatory and company standards, you'll ensure all tasks are completed with utmost safety and quality. Your role encompasses the certification of all line and AOG maintenance support, adhering to current company approvals and licensed certifications privileges.

Main Responsibilities and Duties:

- **Maintenance Execution:** Perform scheduled and nonscheduled maintenance activities within our approved regulatory framework, prioritising safety and operational efficiency.
- **Pre-flight Inspections:** Conduct meticulous pre-flight inspections in adherence to established procedures and quality standards, ensuring the highest levels of safety are maintained.
- **Daily Maintenance Operations:** Execute daily maintenance tasks proficiently within approved service centres, minimising aircraft downtime and ensuring prompt service delivery.
- **Unscheduled Maintenance Coordination:** Coordinate unscheduled maintenance actions effectively, providing timely recommendations to optimise resource utilisation while upholding safety protocols.
- **Crew Support:** Offer comprehensive support to crew members on maintenance-related matters, guaranteeing aircraft safety and reliability throughout operations.
- **Work Order Management:** Release Work Orders in strict compliance with regulatory requirements and company procedures, facilitating efficient record-keeping and minimising operational disruptions.
- **Collaborative Leadership:** Collaborate closely with hangar management to track progress, manage manpower, and address critical path issues, ensuring seamless workflow and timely project completion.
- **Safety and Compliance:** Ensure strict adherence to company policies and health & safety procedures, fostering a culture of safety and compliance across all maintenance activities.
- **Team Leadership:** Provide effective leadership to the assigned team, guiding them to meet financial, commercial, and engineering targets while fostering a collaborative and supportive work environment.
- **Communication and Reporting:** Communicate project progress and updates effectively through appropriate channels, facilitating transparency and alignment across teams.
- **Supplier Collaboration:** Collaborate with support services for efficient spares procurement, managing shortage reports, and accessing repair and technical information as needed.
- **Quality Assurance:** Uphold stringent quality standards by providing clear direction to staff, ensuring comprehensive work instructions, and enforcing adherence to the quality system.

Inflite The Jet Centre

- **Shift Handover Management:** Facilitate seamless handovers between shifts and departments, ensuring continuity and efficiency in operations.
- **Ad Hoc Responsibilities:** Undertake any additional duties as required by the general manager to support the smooth functioning of the department and overall business objectives.

Skills and Experience:

- **Organisational Acumen:** Highly organised with the ability to prioritise tasks effectively in a fast-paced environment, ensuring efficient workflow and resource allocation.
- **Technical Proficiency:** Demonstrated expertise in business jet maintenance and engineering management processes across various domains, with a focus on line, base, engineering, and quality operations.
- **Resource Management:** Proven track record in effectively managing resources, including manpower, materials, and equipment, to optimise operational efficiency and productivity.
- **Leadership Skills:** Strong leadership abilities, with the capacity to inspire and motivate teams towards achieving shared goals while fostering a culture of excellence and collaboration.
- **Communication Skills:** Advanced level of written and oral communication skills, complemented by excellent interpersonal abilities to effectively engage with stakeholders at all levels.
- **Education and Experience:** Possession of a relevant engineering degree and/or substantial aircraft maintenance work experience, coupled with a comprehensive understanding of regulatory requirements and industry best practices.
- **Regulatory Compliance:** Familiarity with technical administration of client aircraft in accordance with competent NAA regulations, ensuring compliance with all necessary standards and certifications.
- **Continuous Learning:** Commitment to remaining updated on all required aircraft types to maintain company approvals and expanding knowledge base wherever possible, demonstrating a proactive approach to professional development.
- **Technical Expertise:** Working knowledge of inspection procedures, methods, equipment, and accepted industry standards, ensuring precision and accuracy in maintenance operations.
- **Certifications:** Valid Part 66 license and completion of a Competent Authority Recognised Part 145 Course, with mandatory Challenger type rating and advantageous Global Express type rating.

What We Offer:

- **Competitive Salary:** We recognise and reward your skills and expertise with a salary that reflects your contributions.
- **Generous Annual Leave:** Enjoy increasing annual leave entitlement as you grow with us.
- **Salary Exchange Pension Scheme:** Secure your financial future with our comprehensive pension plan.
- **Employee Assistance Programme:** Receive support for your mental and emotional well-being.
- **Life Assurance:** Gain peace of mind for yourself and your loved ones with our life assurance coverage (subject to scheme rules).
